Do you know any fire safety rules?

Fire safety rules can help **protect** your family and home.

Let's learn about a few.

Have a 3 foot "kid-free" zone around the stove when cooking.

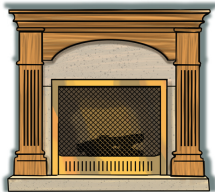

Are you ever around hot things or things that can get hot?

There are things inside and outside the home that are hot or can get hot.

Things like hot drinks, soup on the stove, candles and lighters.

You need to know how to stay safe, so you don't get a **burn**.

Should you stay away from something if it might be hot?

YES! If you are unsure if something is hot, you should stay away from it and check with a grown-up.

Things that are hot can burn and hurt you.

A **smoke alarm** will let you know if there is a fire in your home.

You need smoke alarms in your home.

It will make a loud “Beep, Beep, Beep” if there is smoke.

Should you get out of your home when you hear a smoke alarm?

YES! You should get out of your home right away and go to your outside meeting place.

Firefighters are **community** helpers. They will help if there is an **emergency**.

An emergency could be a fire, or it could be someone in your home who is sick or hurt.

Should you call the fire department if there is an emergency?

YES! You should call the fire department only if there is an emergency.

The number to call for the fire department is 9-1-1.

What are the rules for fire safety?

Fire safety starts with making good choices:

1. Stay away from hot things
2. If the smoke alarm sounds, get outside and stay outside
3. Call 9-1-1 if there's an emergency

Words to Look For:

protect

firefighters

burn

community

smoke alarm

emergency
